SUMMARY

Final-year Computer Networks student at UIT-VNU seeking a **DevOps Intern** role. Hands-on experience building cloud-native systems with Kubernetes, Terraform, CI/CD pipelines, and MLOps at scale.

EDUCATION

University of Information Technology, VNU-HCM

B.Eng. in Computer Networks and Data Communications

– GPA: 8.75/10.00

Ho Chi Minh City, Vietnam

2023 – Expected 2027

AWARDS

Encouragement Scholarship for Academic Excellence

- Semester 1, 2023 – 2024
- Semester 1, 2024 – 2025
- Semester 2, 2024 – 2025

PROJECTS

MLOps PaaS System | GitHub | *Django, FastAPI, Redpanda, PostgreSQL, Docker, Kubernetes,* 3/2026 – Present
AWS, Argo Workflows, MLflow, KubeFlow, BentoML

- Built a multi-tenant MLOps PaaS automating model training, versioned deployment, and drift monitoring for XGBoost, PyTorch, and TensorFlow, orchestrated by a Django REST control plane and Argo Workflows.
- Dynamically served ML/DL models as isolated per-version pods via FastAPI + MLflow (ML) and BentoML (DL); achieved ~100 concurrent users with p95 latency ≤ 100 ms and throughput ≥ 50 req/s.
- Streamed live predictions through Redpanda into an Evidently AI drift monitor; scaled the consumer via KEDA and triggered automated retraining workflows on detected drift.
- Orchestrated distributed model training with KubeFlow Training Operator (PyTorchJob); provisioned GPU/CPU nodes on-demand via Karpenter auto-scaling and delivered zero-downtime updates through rolling HPA.

SageLMS | GitHub | *Spring Boot, FastAPI, LangChain, Redis, PostgreSQL, Docker, Kubernetes,* 4/2026 – 6/2026
GCP, GitHub Actions, FluxCD, Kyverno, Grafana & Prometheus

- Designed a DevSecOps microservices LMS (Spring Boot gateway/auth/course + FastAPI LangChain AI tutor) on GKE with FluxCD GitOps and Kyverno admission policies enforcing supply-chain security end-to-end.
- Automated shift-left CI on every PR: secret scanning (Gitleaks), unit tests (JUnit/pytest/Vitest), Dockerfile linting (Hadolint), Trivy vulnerability scans, IaC validation (Checkov), and SonarCloud quality gates.
- Built CD pipeline that builds, Trivy-scans, signs (Cosign), and attests CycloneDX SBOM per image; Kyverno enforces digest-pinned, Harbor-trusted, non-root pods leveraging GCP Workload Identity for passwordless authentication.

RESEARCH

CSoNet 2026: A Drift-Aware MLOps Framework for Multi-Model Serving: A Network Intrusion Detection Case Study Preview

- First author; proposed a cloud-native MLOps framework with decoupled control/data planes for multi-model lifecycle management; drift-triggered retraining on CIC-IDS2017 recovered Macro-F1 from 0.13–0.46 to 0.98–1.00 ($\Delta+0.54+0.87$).

TECHNICAL SKILLS

Cloud & Infrastructure: AWS, GCP, Terraform, Ansible, Linux

Containers & Orchestration: Docker, Kubernetes, EKS, GKE, Helm, Argo Workflows

CI/CD & GitOps: Git, GitHub, GitHub Actions, Argo CD, Flux CD

Observability: Prometheus, Grafana, Zabbix

MLOps: MLflow, KubeFlow, BentoML, Evidently AI

Frameworks & Databases: ReactJS, Django, FastAPI, PostgreSQL, Redis, Redpanda/Kafka

Languages: Python, TypeScript, Bash, SQL
